X-House

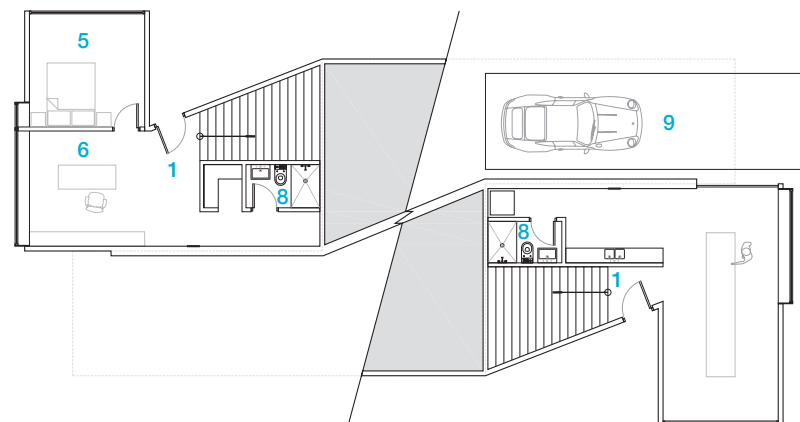

The X House is designed to be easy to construct, adaptable to many different sites, and able to be modified easily according to client desires. The X-House combines contemporary aspects with inhabitant idiosyncrasies: it offers more choice. The way a house functions, its “programming,” is here configured to produce a nuanced environment, and yet a truly alternative arrangement of spaces to is also possible. For example, while the air and water systems are set, numerous floor plans can be developed, family by family. It also is designed to be affordable to build, with many of the components able to be prefabricated and shipped to the site, minimizing the expensive on-site construction costs. Affordability also here means energy efficiency; radiant floors, well-placed skylights, super-insulated walls, high-efficiency plumbing fixtures and green roof areas.

SECOND FLOOR PLAN

2,385 SF
2 bedrooms
3.5 bathrooms

Room	1st Floor	2nd Floor
Living / Dining	—	628 ft ²
Kitchen	—	180 ft ²
Powder	—	20 ft ²
Office	168 ft ²	—
Bedroom 1	141 ft ²	—
Master Suite	—	264 ft ²
Bathroom 1	36 ft ²	—
Bathroom 2	35 ft ²	—
Studio	290 ft ²	—
Deck	—	650 ft ²

Garofalo Architects

Garofalo Architects believe that the practice and products of architectural design should actively participate in and redefine our culture and our environment. In relating the fluidity, flexibility, and complexity of contemporary programs, techniques and technologies, Garofalo Architects generate architecture that engages the complexity of each project.
